PERSONAL PROFILE

Backend-focused Software Developer with experience building production-grade business systems, API integrations, and cloud-hosted applications. Experienced in C#, SQL Server, and Azure, with hands-on work in payment processing, CRM automation, and modular system architecture. Strong understanding of data integrity, system integration, and enterprise application development.

TECHNICAL SKILLS

- Languages: C#, SQL (SQL Server), Kotlin, JavaScript
- Frameworks & Platforms: .NET, Blazor Server, REST APIs, Android (Android Studio), Cloud & DevOps, Azure App Services, Azure DevOps (YAML pipelines), CI/CD workflows
- Databases: SQL Server, Query optimisation, Reporting queries, Schema exploration
- Integrations: Stripe API (Payment Intents, Tap to Pay), HubSpot API
- Tools: Git, Visual Studio, Android Studio

WORK EXPERIENCE

Software Developer | Salon Tracker Software

Oct 2025 to Present

- Lead developer on modular business system components integrated into a legacy platform using C# and Blazor Server.
- Designed and implemented a full Stripe payment workflow, including backend Payment Intent lifecycle management.
- Built a companion Android payment application in Kotlin (Android Studio) to initialise Stripe Tap to Pay transactions.
- Architected REST API integrations (including HubSpot), reducing manual CRM data entry by 60%.
- Designed UDP-based inter-process communication between internal systems to trigger workflow events.
- Refactored and stabilised legacy backend services, reducing production issues and improving maintainability.
- Deployed and managed cloud-hosted applications using Azure App Services.
- Implemented structured logging and improved deployment reliability via CI/CD pipelines.

Support Technician (Expanded into Development) | Salon Tracker Software

Sept 2024 to Oct 2025

- Built and deployed a HubSpot API integration into the company's AppServices platform using C# and REST APIs, automating sales and support processes now used company-wide.
- Enhanced and refactored C# backend code to improve performance, fix bugs, and optimize system stability.
- Designed and maintained internal websites using HTML, CSS, and JavaScript, adding new features and improving client-facing functionality.
- Created and executed SQL scripts to optimize database performance and troubleshoot issues.

- Collaborated with the development team to test and deploy new features, following Agile methodologies and participating in code reviews.
- Contributed to DevOps processes, streamlining software deployments and automating repetitive tasks.
- Provided technical support for clients, resolving complex API and database issues.

IT Support Brilliance Club Ambassador | Brilliant Club

Jun 2022 to Jun 2023

- Provided technical support to underfunded sixth form and college students, focusing on resolving IT-related issues and improving their digital literacy.
- Assisted in troubleshooting basic networking problems and IT queries, enhancing communication and problem-solving skills.
- Developed and delivered IT workshops, enabling students to build foundational tech skills.

EDUCATION & QUALIFICATIONS

Nottingham Trent University - Bachelor's degree – BSc Computer Science

2021 to 2024

- Specialisations: Artificial Intelligence & Machine Learning, Cloud Computing, System Analysis & Design, Software Engineering, Information & Database Engineering, IT Infrastructure, Network Security, Database Management
- Achieved 2.1

Leeds City College - Level 3 Diploma - Computer Science

2019 to 2021

- Achieved Distinction, Distinction, Distinction

Interests and Hobbies

Home lab and self-hosting enthusiast, building and maintaining a personal NAS and cloud storage server. Enjoy digital music production and exploring indie and alternative genres. Fan of challenging RPGs such as Elden Ring, Pokémon, and Monster Hunter, with a particular interest in game mechanics and progression systems. Regular reader of technology and science fiction.
